## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 3-21, are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 7, the prior art fails to teach "wherein the operation condition information includes a reception data error rate of the wireless communication apparatus".

Regarding independent claim 20, the cited reference teaches "the frequency controller switches a frequency of the clock signals among (N+1) frequencies based on an electric field intensity of the received signal." (see col.3 lines 1-3, col.4 lines 8-10). However, the cited reference fails to specifically disclose "the received wireless frequency is judged to be an integer-multiplied value". Therefore, the cited reference does not teach the claim limitation "wherein the clock control operation is conducted when the received wireless frequency is judged to be an integer-multiplied value of an operation clock frequency" as cited in the claim.

Regarding independent claim 21, the prior art fails to teach "the operation condition information includes a reception data error rate of the wireless communication apparatus is judged to exceed a predetermined threshold value" as cited in the claim.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
